

Manufacturing

Pride and Productivity

The manufacturing industry is one of the foundations of our country's economy. It is also rife with legal risks and liabilities. Brooks Pierce attorneys understand the particular needs of manufacturers and develop solid strategies to meet our clients' needs. We represent manufacturing companies of all kinds, including automotive, textile, software and media, metals, electronic equipment, plastics, and pharmaceuticals.

Our services include:

- Corporate – we help with the structure and compliance with the daily operation of manufacturing facilities, and also review and negotiate vendor agreements.
- Intellectual property – we guide manufacturers into applying for patents and trademarks for new technologies, products, and processes.
- Environmental – we offer counsel on compliance with local, state and federal environmental regulations, as well as defending companies against claims of environmental violations.
- Litigation – our attorneys are skilled litigators who fight for our clients in complex business matters, unfair trade practices, and contract disputes. We have also tried cases involving employment disputes, workers' compensation claims and OSHA concerns.
